CAREER OBJECTIVE

Results-driven IT professional with 7 years of hands-on experience in full-stack software development, systems design, and database management, now transitioning into IT leadership roles. Proven track record of leading technical teams, optimizing workflows, and aligning technology with business objectives. Seeking a management-focused role, such as IT Manager or IT Analyst, to leverage both technical depth and cross-functional coordination skills in driving strategic technology initiatives.

EXPERIENCE

DentEmploy, Folsom, California- IT and Dental Assistant (Part-time)

June 2026 - Present

- Create documentation and provide technical assistance to clinical staff on software and technology use.
- Received RDA4U Infection Control Certification, along with OSHA, HIPAA, X-Ray, and Dentist Onboarding training.
- Support digital imaging systems, data organization, and the secure handling of patient information in compliance with HIPAA.
- Assist dentists and hygienists chairside during procedures, prepare operatories, sterilize instruments, and manage operator turnover.
- Configure and maintain practice software, user accounts, and hardware peripherals to ensure uninterrupted clinical workflows.
- Support appointment flow and front-office operations while balancing technical and clinical responsibilities.
- Provide day-to-day IT support for dental practice operations, including troubleshooting workstations and network-connected devices.

Nagarro, Lucknow, India- Principal Software Engineer

June 2022 - October 2023

- Managed code review cycles and sprint delivery timelines, ensuring team adherence to best practices, coding standards, and project milestones.
- Mentored junior developers and interns, fostering team growth through knowledge sharing, onboarding support, and performance feedback.
- Developed project documentation and technical reports to support management in decision-making and stakeholder communication.
- Worked as a Lead Engineer in a Finance tool. We handled the full project, including addressing critical defects, upgrading the application version from Rails 6 to Rails 7, and resolving various vital and essential customer requests.
- Used JIRA to create, manage tickets, and maintain the dashboard. Experience working on GitHub for version control and collaboration.
- Worked as a Senior Engineer in a Banking tool where different banks provided loans to borrowers, where my contributions primarily involved back-end and test cases on RSpec.

SenecaGlobal, Hyderabad, India - Senior Software Engineer

October 2021 - May 2022

- Interfaced with clients and stakeholders to gather requirements, present solutions, and manage expectations across multiple concurrent projects.
- Worked as a Senior Software Engineer in a Content Analysis tool that provides excellent insights into content consumption across all of the assets. It makes it easy to gauge buyers' intent and react to those who are heavily engaged.

- Championed process improvement initiatives in Agile and Scrum environments to enhance team productivity and delivery predictability.
- Used JIRA to create, manage tickets, and maintain the dashboard. Experience working on GitHub for version control and collaboration

Tata Consultancy Services, Lucknow, India - IT Developer

December 2016 - October 2021

- Led a team in activities to develop soft skills, interpersonal skills, and basic corporate etiquette.
- Worked as a Ruby on Rails Developer in an LMS (Learning Management System) that provides an online interface to fill the gap between tutors or institutes and learners.
- Performed defect analysis, fixed the defects, and implemented change requests using the defect management tool, DevPlus, within strict time frames.
- Extensively worked on advanced SQL and MVC architecture.
- Worked in collaboration with the functional team and clients to design and improve the features of the online learning platform.
- Worked in JIRA as well to create and manage different tickets.
- Worked on a mini project involving the concepts of Java, Hibernate, and Spring using JSP and JDBC. Actively worked on AGILE methodology and SOA architecture along with regular workflow maintenance using KANBAN.
